Power Point & SketchUP animations

1. Open SketchUP and make a drawing
2. Create Scenes in SketchUP by selecting View>Animation>Add Scene
3. Zoom, move viewpoint, add color, change time of day or add to model in some other way and add another scene.
4.After you have added all the scenes you want for your animation, select File>Export>Animation. Give it a name and a path to save. It will save your file as an .avi file.
5. Open Power Point and make a new show.
6. Click on the Insert tab>Movie. Browse to the avi file you just created and select it. In the Microsoft Office Power Point dialogue box that pops up "How do you want the movie to start in the slide show," select the button "Automatically."
