

## ARC171 3d Sketchup Modeling Project

Go to <http://sketchup.google.com/3dwarehouse> to get some Chicago building models and import them into a Sketchup drawing. Create roads and place the buildings in a nice composition and add one of your own designs into this composition.

Print out a 11x17 color print of the plan and a perspective.

Project is due on Monday, May 14, last day of class.
